

GOOGLE SKETCH UP: DESIGN A USB KEY

Objective: Students will become familiar with using Google Sketch UP by designing a unique USB key.

- Method:**
1. Students will begin by creating a 2D sketch on one of the planes in Google sketch UP.
 2. Students will use the push-pull tool to extrude their 2D sketch into the third dimension.
 3. Students will create addition 2D sketches, using the faces of their original extrusion to create a unique/creative USB key.

Evaluation: This formative assignment will be evaluated through anecdotal comments and suggestions.
